Section 2 Quiz 1
Steve Martin

Directions: Complete the following questions as best you can. You're free to discuss these questions with the people around you. This IS NOT GRADED, and only intended to help you understand the material.

1. What is a process?

2. What's the difference between a process and a program?

3. Why is a thread sometimes called a 'lightweight process'?

4. Why use threads at all? What are their advantages over process-only computing?

5. What is shared and what is separate among threads?
